

Get qualified with ICE

# Stand out from the crowd

# An ICE professional qualification sets you apart

It will lead to greater success by giving you increased status and greater job security – not to mention higher salaries.

The Institution of Civil Engineers (ICE) is the world's leading civil engineering institution. When you join, you become part of our global community of 90,000 civil engineering professionals in more than 160 countries. You'll have access to a huge pool of resources, so you can learn and keep your knowledge fresh throughout your career.

Becoming an incorporated or chartered engineer and member of ICE is an internationally recognised mark of your engineering skills, knowledge and experience. You also earn the title IEng MICE or CEng MICE.

And whether you're a student, graduate or experienced engineer, we provide unparalleled support to get you there.

Our specialist support teams are always available to help, so you are never on your own. Plus, you will have access to our huge library of resources, as well as training courses, webinars and fast-track workshops.

Take a closer look at how you could benefit from becoming professionally qualified with ICE, and find out how to take

# Take your career to the next level

From earning a higher salary to having more influence in your organisation, there are so many great reasons to get a professional qualification. Here are just a few.

## Progress in your career and earn more money

Becoming IEng MICE or CEng MICE demonstrates you are committed to your career, and work to high standards. This means you'll be in a strong position when it comes to applying for promotions or better jobs. It'll also help you earn higher salaries throughout your working life.

## Increase your professional status

Professional qualification is an important milestone in your career and a prestigious achievement. As well as increasing your status as a professional, it gives you credibility and the respect of colleagues, employers and the public. You'll also have more of a voice within your organisation and the wider industry.

“Becoming a Chartered Civil Engineer with ICE was a real achievement and has opened many doors for my career. I now have more responsibility and gain a high level of job satisfaction as a result.”

Jennifer Bullingham  
CEng MICE  
Senior Site Engineer  
Jacobs/Arup Joint Venture

## Get recognition as a professional

ICE members are highly respected, and qualifying with us is an endorsement of your skills and knowledge.

It means you can put IEng MICE or CEng MICE after your name as a tangible demonstration of your professional abilities. It also feels great to see it on your business card and email signature!

## Your passport to a global career

Our professional qualifications are internationally-recognised and will open up a world of opportunities for your career in civil engineering. From Sydney to Shanghai and Dubai to Delhi, IEng MICE and CEng MICE command respect.

You can also connect with ICE's global network of civil engineering professionals in over 160 countries.

## Your employer benefits too

It's great news for your employer too. It shows they're a top-calibre organisation, committed to high standards and developing the skills of their staff. A qualified workforce helps employers attract and retain the best talent.

# We'll guide you **all the way**

**We're here to help you throughout your journey to professional qualification. Whatever stage you're at in your career, we provide the support and expert advice to help you develop.**

## Students

**If you're studying engineering or an engineering-related course, you'll be eligible for FREE student membership.**

It's a great way to kick-start your career and could even lead to your first job. You'll get to meet other students and graduates, leading professionals and potential employers, as well as receive support for your career.

You can start your journey to professional qualification while you study. If you gain work experience on a placement, sign up for our mentor-supported training programme to record your progress.

You'll also have access to our huge bank of resources to help with your studies, including recorded lectures, webinars and the largest civil engineering library in the world.

“ Civil engineering is a thriving industry to join. As a student member of ICE I can keep up to date with the latest civil engineering projects across the globe. In future, I plan to become professionally qualified which will help me get more responsibility and better employment prospects. ”

Beth McGoff

Student member  
University of Birmingham

## Graduates

**If you want to get on the fast-track to professional qualification, graduate membership is a key step.**

Enrolling on an ICE Training Scheme delivered by an approved employer is the most effective way to get the work-based experience and support you need to become IEng MICE or CEng MICE. If your employer doesn't provide ICE approved training, you can follow our unique mentor-supported training programme.

As part of our support for your career you'll have access to webinars and training courses, which focus on professional qualification, while our support teams provide any guidance you need. You can also boost your CV by getting involved in activities near you through our local networking groups for graduates and students.

“ I really value the ICE Training Scheme, which provides a good structured programme to help me become a qualified civil engineer. ”

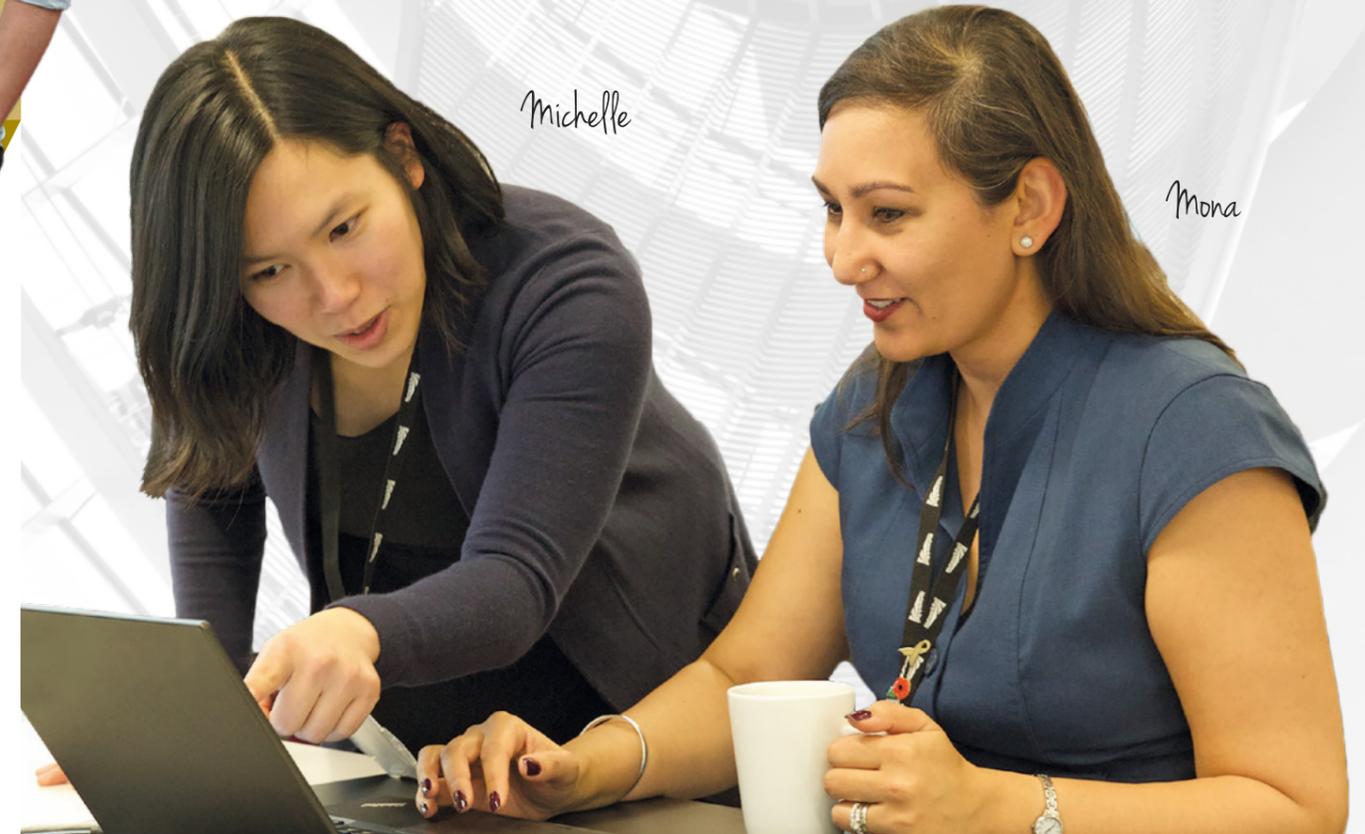

Paul Mills

Graduate member  
Engineer  
Arup

## Experienced engineers

**If you're an experienced engineer, but never had the opportunity to work towards IEng MICE or CEng MICE when you were starting out, don't worry. There are a number of ways you can become professionally qualified.**

We will work with you to select the best option based on your experience and qualifications. Our flexible processes are tailored to your needs and could mean that you are just a step away from applying for the professional qualification you seek.

# Getting there

**Professional qualification is a combination of your academic achievements, your work experience and an assessment.**

**And whatever stage you're at, we make your path as straightforward as possible.**

## Academic qualifications

To become an incorporated or chartered engineer, you'll normally need an accredited qualification. This ensures that you have an appropriate level of academic learning.

**You can find out if your course is accredited for the level you want using the course search tool on our website.**  
[ice.org.uk/coursesearch](http://ice.org.uk/coursesearch)

If your course isn't accredited, don't panic – there are lots of other options. Our membership support team will help you choose the right one and let you know what to do next.

## Work experience

Initial professional development (IPD) is where you develop the work-based experience you need for IEng MICE or CEng MICE.

The quickest and most effective way to complete your IPD is on an ICE Training Scheme. This is a structured training programme run by your employer that will set you on the fast track.

**You can check if your employer runs a scheme using the approved employer search tool on our website.**  
[ice.org.uk/approvedemployers](http://ice.org.uk/approvedemployers)

If it doesn't, you can sign up for ICE's unique mentor-supported training. This is similar to the ICE Training Scheme, except you manage your own training with support from a mentor.

Whichever option you proceed with, we'll provide support throughout your training and a handy online tool to record your progress.

Of course, you may already have the work-based experience you need. If that's the case, you won't need any more training to progress.

## Professional Review

The Professional Review is the final stage in your professional qualification. It's an assessment where you demonstrate that you have the attributes of either IEng MICE or CEng MICE.

The review is made up of two main parts – a report and a review day.

The report goes into detail about your professional experience, including the work you've done and the responsibility you've had.

Then it's your review day. This includes an interview with experienced civil engineers (your reviewers), where you discuss your report and demonstrate your abilities.

We're here to help you prepare for every aspect of your review. We run special workshops, seminars and training courses, many of which are available as webinars.

**You can find out more about the Professional Review on our website.**  
[ice.org.uk/review](http://ice.org.uk/review)

“ Membership of ICE gives me access to a huge quantity of information to support my ongoing development, and opportunities to network with other professionals. ”

Robert Dean  
CEng MICE  
Principal Engineer  
Network Rail
